Do you want to work for one of the world's leading pharmaceutical and healthcare companies, applying your statistical skills and innovative statistical methodology to make key contributions to the development of new medicines?

GSK's goal is to be one of the world's most innovative, best performing and trusted healthcare companies. We have 3 global businesses that research, develop and manufacture innovative pharmaceutical medicines, vaccines and consumer healthcare products. We are committed to widening access to our products, so more people can benefit, no matter where they live in the world or what they can afford to pay.

GSK has a thriving global community of statisticians across the three divisions of our company. Within the pharmaceutical division, our clinical statisticians are industry leading experts in data analysis and methodologic research. Our end-to-end project support model ensures that our statisticians collaborate across the entire range of drug development, from early clinical development, to registration and marketed product support.

**Details:**

- Providing statistical input to the design, analysis, reporting and interpretation of clinical studies.
- Influencing clinical development plans, regulatory and commercial strategies.
- Building and maintaining effective strategic working relationships with internal and external partners to meet business needs.
- Identifying, developing and implementing novel statistical methodologies in support of medicines development.
Our end-to-end project support model ensures that our statisticians work across the entire range of drug development, from early clinical development, to registration and marketed product support.
