UNIVERSITY OF PITTSBURGH
Dietrich School of Arts and Sciences
Department of Statistics

Lecturer

The University of Pittsburgh's Dietrich School of Arts and Sciences is seeking applications for a Lecturer in the Department of Statistics beginning September 2019. The position is outside of the tenure stream with the expectation of rolling multiyear contract renewals for a successful lecturer.

Candidates should preferably have a PhD in statistics, biostatistics or related field and a demonstrated talent for teaching undergraduate statistics courses and possibly applied masters courses. Lecturers are involved in advising undergraduate students, mentoring graduate teaching assistants, course development, and other administrative and scientific activities for the department's functioning and growth. The candidate is expected to have knowledge about the breadth of statistics and its interface with other disciplines. The applicant should have at least 5 - 7 years of successful teaching experience as a full-time lecturer. The normal teaching load is three courses each semester. Reductions in teaching may be possible depending on the approved non-instructional activities supported by a lecturer. (This position is subject to final budgetary approval.)

The department currently has eight tenure-stream faculty and two teaching faculty. There are over forty graduate students and very active undergraduate majors and minors programs. The department has close ties to the Department of Biostatistics in the Graduate School of Public Health, the Department of Psychiatry in the School of Medicine, the Department of Industrial Engineering in the School of Engineering, and a number of departments within Arts and Sciences. The University of Pittsburgh has made a strategic commitment to furthering its research infrastructure for data science and also fostering its instructional programs in data science. The newly restructured School of Computing and Information and the Department of Statistics are collaborating in these developments. The University of Pittsburgh is ranked nationally as ninth in science and engineering research funding and fifth in NIH funding.

Additional information about the department can be found at http:www.stat.pit.edu/. Informal inquiries about this position may be directed to Dr. Carl Bodenschatz, Senior Lecturer, at cboden@pitt.edu. Applicants should submit a detailed cover letter, a curriculum vitae, a diversity statement, and three letters of reference. For each reference, you will have the opportunity to input an email address, and an email notification will be sent to the designated address with instructions about uploading the letters to our system. Candidates should apply online at https://facultysearch.as.pitt.edu/apply/index/MjQx. Review of applications will begin November 1, 2018, and will continue until the position is filled. The University of Pittsburgh is an Affirmative Action/Equal Opportunity Employer and values equality of opportunity, human dignity and diversity. EEO/AA/M/F/Vets/Disable.
