GCE Solutions is a global clinical research organization (CRO), founded in 2006 in the US. We assist in clinical development in the pharmaceutical, biotechnology, and medical device industries with various programming, statistical, and consultancy tasks among an array of therapeutic areas and phases.

We have offices in the US, Europe and India. Every employee has a personal development and career plan, and due to the growth of the company, the development potential is huge. We also offer an annual performance bonus, and a competitive benefits package. Role overview: Statisticians play significant role at GCE and you will contribute to all technical statistical activities for at least 1 study. Project leading also means regular communication with internal and external teams on all the statistical elements and on various studies. A crucial aspect is of a Statistician is protocol design, writing analysis plans, design CRFs, review statistical datasets and attend functional meetings

Responsibilities & Requirements:

- Work on the protocol design with clinical scientists
- Write statistical analysis plans
- Help design case report forms to ensure all data points are collected for the tables, figures, and listings and other protocol-specific objectives are met
- Review and approve analysis dataset specifications
- Produce analysis specified in statistical analysis plan and ad-hoc analysis as requested
- Develop study analysis plans as a team member and lead this effort for selected studies
- Develop statistical programs as necessary to perform analyses and prepare data displays
- Keep abreast of new developments in statistics, drug development, and regulatory guidance through literature review and attendance at workshops and professional meetings
Qualifications:

- MSc or PhD in Medical Statistics 4+ years
- Statistician experience within pharmaceutical or CRO environment.
- Leading on a single project and contributing to the project team.
- Have written Statistical Analysis Plans Focus on communication, quality, timelines and highly technical.
