Epidemiologist

Boehringer Ingelheim is an equal opportunity global employer who takes pride in maintaining a diverse and inclusive culture. We embrace diversity of perspectives and strive for an inclusive environment which benefits our employees, patients and communities.

**Description:**

To design, produce, and disseminate robust relevant real world data and epidemiological studies in order to drive innovative strategies and aid evidence based decision making by customers across the Prescription Medicine (PM) portfolio. In doing so, to provide epidemiological support to achieve the objectives of the respective Franchise Therapy areas.

**Duties & Responsibilities:**

- Design and lead the production of successful epidemiological and real world data studies in order to raise awareness of disease or product specific outcomes. Disseminate results and interpretation of these studies throughout the Franchise and Sales teams, in a manner cognisant of Franchise objectives
- Responsibilities include the writing of protocols, securing of internal protocol sign off, data analysis and the production of reports and manuscripts, in collaboration with Corporate Epidemiology / Market Access as appropriate
- Utilise real world data sources to provide epidemiological information and interpretation across the business
- Produce real world data to ensure that Health Technology Assessment submissions contain rigorous epidemiological evidence. Provide epidemiological and statistical expertise to Health Economists to support economic modelling and data analysis for HTA submissions
- Analyse market information using real world data sources to increase knowledge of our brands and customers
Opportunity spot and lead the use of real world data in Key Accounts to provide information and epidemiological expertise to Value and Outcome Consultants VOC’s and Key Account Managers in response to customer needs and queries

Fosters the in-house development and training of BI Associate Epidemiologist, and colleagues in other functions, providing guidance on RWE/epidemiological studies

Takes a prominent role in cross-functional Franchise teams and is a recognised authority, ensuring that Market Access is integral to brand strategy and tactics

Leads epidemiological input during the development, review and refinement of UK/Ireland Integrated Brand Plans for BI products in collaboration with various internal stakeholders. Contribute to the development of strategy across all Market Access areas of expertise

Requirements:

Required Education & Knowledge

- Degree or equivalent qualification in mathematics, statistics, or related discipline
- Relevant post-graduate qualification, e.g., MSc/PhD in Epidemiology or related discipline
- In-depth knowledge of epidemiological methods, and medical statistics applied to epidemiology
- Proven knowledge in the management of epidemiological data and methods used to organise and analyse large sets of data
- Knowledge and experience of running epidemiological studies, from proposal writing to publication of results
- Knowledge of statistical methods applied to health economics would be advantageous
- Good understanding of CPRD (or equivalent anonymised patient-level database) and the UK health system would be advantageous

Our Culture:

Boehringer Ingelheim is a research-driven pharmaceutical company and one of the top 20 pharmaceutical firms worldwide. Headquartered in Ingelheim, Germany, Boehringer Ingelheim operates globally in over 100 countries and has more than 47,700 employees. The focus of the family-owned company, founded in 1885, is researching, developing, manufacturing and marketing new medications of high therapeutic value for human and veterinary medicine. In 2014, Boehringer Ingelheim achieved net sales of about 13.3 billion euros. R&D expenditure corresponds to 23.1% of its net sales.
