Position: Data Analyst
Site: Columbia University, Department of Obstetrics and Gynecology
Location: New York, NY

Requisition no: 504247
Work type: Full Time
Location: Medical Center
School/Department: Obstetrics and Gynecology
Grade: Grade 104
Categories: Administrative Support, General Administration, Research (Lab and Non-Lab)

Position Description:
We have an immediate opening for a data analyst position in the Epidemiology and Biostatistics group in the Department of Obstetrics and Gynecology at Columbia University Medical Center. The successful candidate will be involved in the research projects funded by the NIH.

Responsibilities:
Possible research projects include, but are not limited to, dietary and environmental factors in relation to the risk of chronic diseases including cardiovascular disease, cancer and cognitive decline/impairment. This person is expected to help analyze data, summarize and present the results, and write scientific journal articles. The duties may also include other tasks assigned by the supervisor.

Minimum Qualifications:
- Requires a bachelor's degree or equivalent in education and experience, plus three years of related experience.
- The successful candidate should demonstrate ability in computer programming, and ability of independent thinking and possession of excellent communication and writing skills.
- Must be able to work effectively with minimal supervision

Preferred Qualifications:
- Master’s Degree Preferred.
- Experience working in nutrition, epidemiology, biostatistics, anthropology or closely related field, with interest in nutritional epidemiology.
