RAND Corporation  
Santa Monica, California; Washington, DC; Pittsburgh, Pennsylvania; Boston, Massachusetts

**Number of Positions:** 35-45  
**Type of Student:** Graduate students who have completed at least 2 years of graduate work leading to a doctorate

**Deadline:** December 4, 11:59 p.m. PT

RAND’s Summer Associate Program introduces outstanding graduate students to RAND, an institution that conducts research on a wide range of national security problems and domestic and international social policy issues. The program runs in the summer months only.

Summer associates work at RAND full-time for a 12-week period. All summer associates are co-located with project mentors.

RAND is interested in students who are enrolled in PhD programs in statistics, biostatistics, or applied statistics. Candidates should have strong theoretical training and empirical skills, including experimental design, sampling, and modeling. Experience with causal inference, multilevel modeling, social network analysis, spatial statistics, and survey methods is also strongly desired. Programming skills in R, SAS, Stata, or WinBUGS are also useful.

Submit your application. RAND accepts applications through its website only.
