Fixed Term Contract until 30 September 2024.

Warwick Medical School (WMS) wishes to appoint an Assistant Professor in Medical Statistics within the new NIHR Applied Research Centre (ARC) West Midlands. As a key member of a wide-ranging programme grant focusing on applied health research, you will work closely with the head of the group, Professor Richard Lilford, and others in the group to develop a strong programme of personal research in medical statistics and will lead and contribute to research grant applications. You will have an opportunity to develop experience in cluster trials, including uni-directional crossover designs, mediator analysis and Bayesian networks. As part of a team providing rapid response to health service research priorities, you will be responsive and flexible in order to manage this evolving and fast-paced environment.

Informal enquiries regarding this post may be made to Richard Lilford, Professor of Public Health (r.j.lilford@warwick.ac.uk).

Full details of the duties and selection criteria for this role are found in the vacancy advert on the University of Warwick jobs page. You will be routed to this when you click on the Apply button.
